

PROJECT TITLE

HD 60 KimLock Heavy Lift in Korea.

DATE

January 2010.

BACKGROUND

The KimLock Slings were used on the Hyundai HD-60 1800 tons Lifting-Capacity Derrick Crane Barge during an offshore lift.

ITEMS

This new design of cable laid sling utilizes a resin filled KimLock socket combined with a Flemish eye splice to achieve an extremely high breaking load. The slings were manufactured to PM20 (1987) and all length tolerances compiled with this specification.

- 2 KimLock Cable Laid Slings, 199mm dia x 53.50m effective length, MBL 1700 MT.
